GCPS EDUCATIONAL TECHNOLOGY NEWSLETTER | OCTOBER 2020

LOOM

Loom is a tool that you can use to record yourself and/or your screen, which allows you to walk your students through digital tasks while physically showing them what you are talking about! Click the video to the right for a tutorial.

Loom Pro is free for teachers!
Click [HERE](#) for more info.

WEEKLY SCHEDULE TEMPLATE

Click the image below to make a copy of a resource that could be used digitally or printed to help your students and parents stay on track with what they need to do for virtual and in person days.

Monday	Tuesday	Wednesday	Thursday	Friday

Google Sharing Tricks

Force a copy:

You may want to share a Google file with a colleague but wouldn't want them to change your copy. You can simply change the link to force them to make their own copy before they can view.

- Change the share settings to "make the document available to anyone with the link".
- In the web address bar on your Google Chrome browser, delete everything up to and including the e in edit and replace it with the word copy.
- Copy and share that url.

Force Present mode:

If you want students or colleagues to view a Google Slide you've made, but don't want them to edit the slides, you can use the Present Mode trick.

- Change the share settings to "make the document available to anyone with the link".
- In the web address bar on the your Google Chrome browser, delete everything up to and including the e in edit and replace it with the word present.
- Copy and share that url. This can be especially useful in Google Classroom.

USING GOOGLE DRIVE & CANVAS OFFLINE
